8. Lenel Job Aid: View Alarm Map

1. Login to Alarm Monitoring via the RDS webpage: rds-lenel-prd.stanford.edu
2. Navigate to View → Map Selection …
3. Scroll to your map, use single click to highlight it and click OK. (Sometimes if you try to double click it, it selects a different map.)
You will then be presented with the map you selected. Notice the reader on the map. If the reader alarms you will see a red ALARM word next to the reader. You must be viewing the map in real time of the alarm in order to see this messaging.
